STYLISH FLYING INSECT CONTROL

Genus® | ILLUMÉ

Led by a clear understanding of flying insect behaviour, the Genus® Illume imitates the look and feel of a modern urban lighting fixture yet offers a greater insect attraction than alternative ILT's.

- Designed to look like a modern lighting fixture
- Offers the largest catch area of unit of its size
- Available in range of colours to complement existing decor
- Easy, fast and safe in situ servicing

INNOVATION IN ACTION

Genus® | iLLUMÉ

The Genus® Illumé flying insect control unit has been designed in a timeless art deco style that can be incorporated within any interior décor.

The Genus® Illumé is designed to offer discreet insect control for all "front of house" areas such as bars and restaurants, and it will also grace any home environment.

The Illumé uses well-proven ultraviolet light technology to draw the insects into the body of the unit. The light is created by a very efficient, 26W compact, fluorescent lamp uniquely developed by our designers for its compact size yet very high light output.

Once attracted the insects are then trapped on specially formulated glue boards. The boards are cleverly hidden from view within the Illumé body and can be quickly and easily changed as required. The Genus® Illumé can be supplied in a range of colours to suit your décor. The unit can be hard wired or alternatively a mains lead and plug is supplied to facilitate easy installation.

FEATURES & BENEFITS

- Designed to look like a modern lighting fixture makes Genus® Illume perfect for sensitive front of house locations
- 26 Watt UVa lamp output lamp offers a greater flying insect attraction than alternative ILT's
- Available in a range of colours to compliment or contrast existing decor
- Large HACPP compliant glue board system offering largest (discreet) catch area for unit of comparable size
